Emergency Phones

What is a Code Blue Emergency Phone?
One method for contacting Campus Security is through the Code Blue Emergency Phones. These are emergency phones that provide two-way communications between you and Campus Security with the push of a button.

To activate the Code Blue Emergency Phone:

1. Press the red button labeled “PUSH FOR HELP,” located on the face plate.
2. You will hear a dial tone followed by a ring tone.
3. A campus security officer will answer, “Campus Security.”
4. You will hear a digital voice announcing the location of the Code Blue Emergency Phone, for example, “ECB11.”
5. Speak into the speaker. Please note that our two-way communication is limited so that only one person can speak at a time, similar to a walkie-talkie.

If you are unable to speak, Campus Security can still respond to the location because the Emergency Code Blue Phone identifies its location to the Campus Security Officer and the blue strobe light is activated.

You can view the locations of the Emergency Phones on the campus map.

From Your Phone

- Campus Security can be reached by calling (808)689-2911 24/7/365.
- The Honolulu Police Department, Honolulu Fire Department and Emergency Medical Services emergency dispatch can be reached by calling 911.
