# HAWAI'I ADVANCED TECHNOLOGY SOCIETY:
WEB APPLICATION EXPLOITATION
www.hats.team/register

Event Overview

Training – Customized training and lectures designed to get your feet wet and ready to jam challenges. Quick and dirty tutorials, we're not trying to make experts, but get you to the level where you feel comfortable exploring.

Mentors – Students will be provided with a mentoring team designed to specifically help them throughout the event. Feeling stuck? They'll help you get over that hurdle, pushing you harder and farther.

Challenges – Challenges designed to help walk you through a story, presented between lectures and utilized to reinforce concepts learned. Straight to the point and hands on, this is where learning happens.

Come Early – Web Application Exploitation is not easy. 8 hours is not enough time. Come early if you want to maximize benefit, stay until the building closes down and tell us to go home.

Group Learning – We'll be moving together as a group, get to know the people around you and ask for help. We want to build a community of learners and people that grow from engagement.

Training Range – Don't have a laptop or Kali environment? We've got 30 computers provided by UHWO with everything you need. Bring your own environment if you have it; it's always better to be in an environment you're familiar with.

Free Food – Lunch provided by us for free!

August 12, 2017 8:00AM-4:00PM
University of Hawaii: West Oahu, Bldg. B
Rm. B155 CENT/ISA Lab
Available to UH Students only
