

WE RISE

CONFERENCE: THE RISE OF BUSINESS AND TECHNOLOGY IN HAWAII

Learn how companies are leveraging emerging technologies.

Hear from top industry leaders in government, military, retail, security and technology. They'll discuss the evolving technology and concepts in areas like the Internet of Everything, supply chain management, cyber security, block chain technologies and big data.

Topics to be discussed:

- **Cybercrimes & Cyber Security**
Learn about the latest strategies and issues involved with protecting data and systems.
- **Cloud Data Security**
Find out about the evolving technologies, strategies and threats in cloud computing.
- **Internet of Everything**
Discover the opportunities and challenges in the expanding connection of devices around the world.
- **Supply Chain Management**
Hear about technology's impact on the delivery of raw materials and finished goods.
- **Block Chain Technologies**
Get the latest on distributed databases and their impact on commerce.
- **Big Data**
Gain insights into strategies and concepts to produce efficiencies of cost, productivity and innovation.
