UH West O‘ahu Emergency Call Boxes

What is an Emergency Call Box?

One method for contacting Campus Security is through the Emergency Call Box (also known as a Code Blue Phone). These are emergency phones that provide two-way communications between you and Campus Security with the push of a button.

To activate the Emergency Call Box:

1. Press the red button labeled “PUSH FOR HELP,” located on the face plate.
2. You will hear a dial tone followed by a ring tone.
3. A campus security officer will answer, “Campus Security.”
4. You will hear a digital voice announcing the location of the Emergency Call Box, for example, “ECB11.”
5. Speak into the speaker. Please note that our two-way communication is limited so that only one person can speak at a time, similar to a walkie-talkie.

If you are unable to speak, Campus Security can still respond to the location because the Emergency Call Box identifies its location to the Campus Security Officer and the blue strobe light is activated.

From your phone:

- Campus Security can be reached by calling (808) 689-2911 24/7/365.
- The Honolulu Police Department, Honolulu Fire Department and Emergency Medical Services emergency dispatch can be reached by calling 911.
